

Separator OTC 5-01-037 / 10-01-037 / 20-01-037

Technical Data | Clarification or purification of cooling lubricants, washing liquids, oil water mixtures, lube oil, fuel oil, waste oil, etc.

Frame, hood and drive

This separator is equipped with a solid-wall bowl for clarification of liquids or purification of liquid mixtures with simultaneous removal of solids. The product enters the rotating bowl through the product feed and is separated in the disk stack. The separated and purified light and heavy liquid phases flow outwards over the separating disk and are discharged under pressure by the centrifugal pumps. The separated solids collect in the solids holding space and must be removed by hand.

The separator of enclosed design is equipped with an oil level sight glass. The hood is removable. The machine is driven by a 3-phase AC motor. Power is transferred to the bowl spindle via a flat belt. All bearings are splash-lubricated from a central oil bath.

Materials of construction

Frame:	Grey cast-iron
Hood:	Grey cast-iron
Main bowl parts:	Stainless steel
Gaskets:	NBR

Features

- Standard motor
- Low-noise version
- Light weight
- Bowl of stainless steel
- Heavy and light phase discharged under pressure
- Easy conversion into clarifier

Technical Data OTC 5-01-037 / 10-01-037 / 20-01-037

Operating principles and constructional features

- 1 Product feed
- 2 Discharge
light liquid phase
- 3 Discharge
heavy liquid phase
- 4 Disk stack
- 5 Centripetal pump
- 6 Solids holding space
- 7 Separating disk

Standard equipment

- 3-phase AC motor
- Rubber cushions
- Set of tools
- Set of commissioning parts
- Set of regulating rings
- Set of hoses (for feed and discharge)
- Technical documentation

Additional equipment

(available at extra cost)

- Set of spare parts for 8000/16,000 operating hours
- Conversion set for clarifier
- Stainless steel hood
- Flow indicator
- Each separator is also available as ready-to-connect compact unit, including accessories

Applications

- Automotive industry
- Disposal companies
- Engineering works
- Steel mills
- Oil and gas industry
- Power plants
- Shipping industry
- Steel rolling mills, etc.
